Dairy RegTech

What is Dairy RegTech?

Dairy RegTech is an innovative program that acknowledges that a strong food safety culture results in better food safety outcomes. It also aims to better employ technology to optimize the capture, analysis and utilisation of food safety data generated by dairy businesses.

Dairy RegTech was designed to continuously improve how we measure, monitor and manage food safety in the Victorian dairy industry.

Why sign up to Dairy RegTech?

• Provides measurable insight into the maturity of your food safety culture

• Maps a pathway for strengthening food safety culture

• Audits are more targeted and focused

• Provides a better understanding of the food safety data collected by your business and how it can be used more proactively

• Develops a flexible, tailored and collaborative/constructive partnership with DFSV

• Improves food safety outcomes and reduces compliance costs

Empower people   **Work together**   **Tailored support**   **Effective data**

How do I join Dairy RegTech?

Apply 1 — Apply via our website at https://www.dairysafe.vic.gov.au/dairyregtech

Assess 2 — Complete online survey and onsite culture assessment to obtain a food safety culture score for your business

Plan 3 — Develop an action plan and submit to the DFSV for review

Strengthen 4 — Submit food safety performance data to enable future audits to be more focused and to facilitate continuous improvement
